

CSC309, Weekly Report 3

February 26, 2015

Please visit <https://trello.com/b/cXmtQocZ/csc309> to see overall project plan/status

Summary: Almost all major features are now feature-complete. We have working registration, administration, project creation and funding. Work will start to focus more on the presentation in the coming week(s).

Alec Brunelle (g3brunel)

- More dashboard features and optimization
- Community index page

Benson Chan (g3chanbf)

- Finishing up work on user profiles.
- Mainly working in increasing test coverage in this area.
- Will continue with 'nice-to-have' features for user profiles.

Chris Sandison (g3flylo)

- Adding banners for projects
- Small modelling and test fixes

Timo Vink (c4vinkti)

- Started work on location-based communities
 - Curated custom DB with country/city info
 - Added JSON API for retrieving a list of countries / cities in a given country
 - Added elements to the "create project" form to allow the creator to specify which countries/cities this project is relevant to.
 - RSpec tests for the above API.
- The coming week I'll be working on allowing users to specify their hometown, and then adding ways to easily find and retrieve projects that are close to the user.
